2023 Benefit
Night at the Museum
SUPPORTER LEVELS

AS A SUPPORTER, YOU WILL ENJOY THE FOLLOWING BENEFITS:

➔ Each level receives a one-year CuriOdyssey membership (with parking)
➔ Includes event tickets according to supporter level
  ◆ Additional tickets available for purchase at $150/ticket
➔ All benefit supporters will be recognized (name and/or logo):
  ◆ In the digital and printed invitations
  ◆ On CuriOdyssey’s website
  ◆ During the Fund-a-Need as an early supporter
  ◆ Scrolling throughout the evening on monitors

CURATOR
$25,000
CuriOdyssey encourages children to learn by doing, watching results, and drawing their own conclusions about how the world works. We provide opportunities to engage and interact with actual phenomena, materials, wildlife and science. This is the first step in developing inquiring minds and it lays the foundation for further interest in science.

Includes 10 event tickets.

CONSERVATOR
$10,000
CuriOdyssey provides a loving habitat for animals that would no longer survive in the wild. Our animals experience optimal quality of life and dedicated care from our professionals. Every animal has a preventative medical program that outlines the care plan for each species. A veterinarian is on-site each week and on call 24 hours a day for advice and assistance. Ongoing support for our rescued wildlife is crucial to their health and to our daily operations.

Includes 8 event tickets.

EXHIBITOR
$5,000
Exhibits are a part of CuriOdyssey’s DNA, serving as a cornerstone of visitor experience and a primary method of STEM education delivery to our target audience. Our philosophy holds our exhibits to very high standards: our exhibits must promote unique, rich, robust, and authentic encounters with the natural world. These engaging, one-of-a-kind, instructional exhibits make CuriOdyssey THE cutting-edge destination for early STEM education in the Bay Area.

Includes 6 event tickets.

DEVELOPER
$2,500
Developing future generations of problem solvers is more important now than ever before. STEM education develops building blocks for an effective critical thinker. CuriOdyssey teaches STEM education to young children, both in and outside of a traditional school setting, as a foundation for developing the next generation of science-fluent citizens.

Includes 4 event tickets.
